About Western Institute of Technology

Western Institute of Technology has been approved by the Indira Gandhi National Open University (IGNOU), New Delhi as a “**Community College**”, and is authorized to offer Diploma, Associate Degree and Degree Programs, in various programs including **SAFETY, HEALTH & ENVIRONMENT** and **EMERGENCY MANAGEMENT**.

Western Institute of Technology (WIT) is also recognized by the Government of India, registered under the **Directorate General of Employment & Training** as Vocational Training Provider for **SAFETY, HEALTH & ENVIRONMENT** programs.

WIT, an **ISO 9001:2008 Certified Institute**, has also in conjunction with Franklin University, established in India, a "Host Training Site" for the **University of Cincinnati NIOSH Education and Research Center** to offer specific **OSHA (Occupational Safety & Health Administration)** courses.

Further, WIT is a collaborative training provider of Continuing Education Programs of **University of Wisconsin Platteville, U.S.A** and approved education provider of **Franklin University, Ohio, USA**.

About the Program

The Bengal Chamber in partnership with the Western Institute of Technology is offering the Certificate Course for working executives to **learn and enhance** their expertise in managing their roles on SH&E. The course will teach & train the candidates about the **latest world standards in SH&E Management & Implementation**. **International faculty with decades of training experience** in SH&E and **Emergency Management** will also be conducting the sessions for a complete & comprehensive knowledge to the candidates.

This one-of-its-kind course on SH&E will also include a module on **Personality Development** by **internationally renowned motivational speaker** to help candidates imbibe the values of safety in life.

About the PROJECT

For a qualitative assessment of the candidates, there is a mandatory module on SH&E project. In this the candidates have to actually make a project encompassing the **current state of SH&E structure** in their organisations, the **areas of improvement** with reasons thereof, **approach & methodology to implement** the same, and the **financial/practical implications** too.

Further, the project also needs to forecast the expected **monetary savings/community welfare gains** to be profited by the organization due to **stringent SH&E guidelines**.

The project will be assessed and evaluated by SH&E experts for onward submission to the company heads by the candidates. It is meant to provide inputs to the management for further planning and execution.

Unique factors about the Course

A typical candidate post completion of the course will be well equipped to conduct/improve on the following job responsibilities:-

- A) Implementation & **regular assessment** of the SH&E structure in an organization.
- B) Ensure phenomenal reduction in SH&E related losses as a **Risk Control Professional**.
- C) Help create a practically **sustainable motto** for SH&E in terms with the existing mission & vision of the organization.
- D) Regularly conduct & **impart awareness training** to working colleagues.
- E) Impart the “**Train the Trainer**” training on both **SH&E and Emergency Management**, to teach & equip others in (say) different departments, across the organization.
- F) Help the organization **meet & exceed** national & international standards on SH&E.
- G) PERIODICALLY CONDUCT A **SAFETY AUDIT TO FORECAST ANY PERCEIVABLE THREATS/RISKS TO THE ORGANIZATION**.
